**Cataraqui Golf and Country Club
Kingston, ON**

Crossing the Continuum:

Panel discussion on rehabilitation and services after brain injury

After a brain injury occurs, individuals are catapulted into a health care system that is varied and complex. *Crossing the Continuum* will walk with you, step by step through this process, from the acute care to rehabilitation to life going forward. This will be of interest to all who have begun this crossing with a loved one, no matter where they are along the way. We are honoured to welcome six local professionals, who will share how their services meet the individual's needs during the rehabilitation process and answer common questions about brain injury.

Our panel:

Ingrid ten Bruggenkate, MSW RSW, is the Social Worker for the inpatient Neurosciences unit at the Kingston General Hospital. She sees patients in the acute stage of recovery to assess needs, provide support, and plan for future services which may be required.

Dr. Karen Smith, MD FRCPC, is a Physiatrist with the Providence Care Acquired Brain Injury Program at St. Mary's of the Lake Hospital. Dr. Smith is an essential component of the rehabilitation

program for those in the post-acute stage, working to help restore function and ability after injury.

Bill Gibson, MSW RSW, is the Social Worker with the Providence Care Acquired Brain Injury Program at St. Mary's of the Lake Hospital. He provides assessments, education and adjustment and resource counselling, and helps to coordinate services upon discharge from hospital.

Carol Rogers, MSW RSW, is the Social Worker with the Child Development Centre Acquired Brain Injury Team at Hotel Dieu Hospital in Kingston. She provides support to children who have sustained an ABI, as well as their families.

Dr. Martin Logan, C. Psych., is the Neuropsychologist with the Providence Care Regional Community Brain Injury Services. He provides clinical oversight to the program and neuropsychological assessments for the purposes of service planning.

Nancy McFadyen, MSc. OT Reg, is an Occupational Therapist in private practice near Smiths Falls. She sees clients in the community, providing needs assessments, cognitive rehabilitation, and client-centred ABI education for families about the impact of brain injury.

Do you have a question about the healing journey? Please share with us! Selected topics will be highlighted during the discussion, with additional time for Questions and Answers following the presentation.

Registration

Yes, I/we want to sign up for this important workshop.
